Forecast for Tuesday 25 Jul 2023

Weather: Generally dry through the early hours with cloudy periods interspersed with occasional clear spells and a low chance of a rogue shower. Some sunny intervals on Tuesday morning but a chance of a few showers, locally briefly heavy. Any showers tending to clear through the afternoon to leave increasing amounts of sunshine to end the day.

Chance of cloud-free hill tops above 600m: 80%

Low cloud and visibility: Patches of cloud above 750-850m are possible during the morning, mostly in association with any showers. All cloud above summits by the afternoon. Generally very good visibility with distant views but locally poor in any cloud and possibly brief deteriorations in any showers.

Meteorologist's View

A fine day for hill walking by enlarge. Despite it still feeling rather cool for July, remember your sun protection as increasing amounts of sunshine through the afternoon will give high if not very high UV levels for a time.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 24 Jul 2023	4.2mm	25.8mm	50.8mm

Forecast for Wednesday 26 Jul 2023

Weather: Dry and clear during the early hours, but increasing amounts of cloud by dawn. After a rather cool start with some brightness first thing on Wednesday, cloud steadily thickening during the morning with occasional rain developing by mid-afternoon. Rain setting in by the evening, this possibly heavy at times.

Maximum wind: Southwesterly 15 mph increasing to 20 mph gusting 30 mph by the evening.

Chance of cloud-free hill tops above 600m: 70% at first, reducing to 30% by early afternoon and becoming less than 20% by the evening.

Low cloud and visibility: Patches of cloud developing above 700m by the end of the morning with more extensive periods above 600m by early afternoon. Widespread cloud above 500m by early evening with periods as low as 300m forming in the south and west as rain sets in. Good visibility during the morning, becoming moderate and occasionally poor in rain. Widely very poor at higher levels by late afternoon with extensive hill fog.

Temperature: **Valleys:** Plus 7 Celsius rising to plus 19 Celsius.
At 600m: Plus 13 Celsius.
Freezing level: Well above the summits.
